Chapter number	Software required (With version)	Free/Proprietary	If proprietary, can code testing be performed using a trial version	If proprietary, then cost of the software	Download links to the software	Hardware specifications	OS required
1-16	Python 3.6	Free			`https://www.python.org/downloads/`	Any	Any
9	Beautiful Soup	Free			`https://pypi.python.org/pypi/beautifulsoup4`	Any	Any
9	Pillow	Free			`https://pypi.python.org/pypi/Pillow`	Any	Any
14	PyMonad	Free			`https://pypi.python.org/pypi/PyMonad`	Any	Any

Detailed installation steps (software-wise)

The steps should be listed in a way that it prepares the system environment to be able to test the codes of the book.

1. Install Python 3.6. Go to `https://www.python.org/downloads/` and follow the instructions here.
2. Install the additional packages using the `pip3` command. Appropriate privileges will be required to install software. In some cases, the `sudo` command may be required.
   1. In most cases, this will be
      ```
      pip3 install pillow beautifulsoup4 PyMonad
      ```
   2. In some cases, the command for doing extra installs will use the command `pip` instead of `pip3`. If `pip3` is not found, try `pip`.
